Smallpox in Naples.—Week ended April 25: Thirteen cases of smallpox with 1 death reported at the health office of the city of Naples.

A case of varioloid was discovered among passengers for the steamship *Montevideo*, April 23. The patient was transferred to the Cогtugno hospital for contagious diseases. The family and 9 other contacts were rejected and placed in observation. The boarding house in which they all had been lodged is temporarily closed for disinfection, etc.

Status of smallpox in Italy.—Week ended April 25. Cases: Binasco (Milan), 2; Verona, 1; Pardenone (Udine), 4; Campobello (Trapani), 1; La Maddalena (Sassari), 1.

JAPAN.

Report from Yokohama—Examination of emigrants.

Passed Assistant Surgeon Cumming reports:

Number of emigrants per steamship *Korea* April 24, for San Francisco, recommended for rejection, 1.

Rejection was for trachoma.

Reports from Kobe—Inspection of vessels—Examination and disinfection of emigrants—Plague—Plague on Island of Formosa, January 1 to April 12, 1909.

Acting Assistant Surgeon Knight reports, April 15 and 21:

Week ended April 10. Supplemental bills of health granted to 7 steamships.

There were inspected 194 members of crews and 50 steerage passengers, and 27 members of crews and 25 steerage passengers were bathed and disinfected. Their effects were disinfected by steam. The number of pieces of baggage steamed was 127 and bedding 50. Manifests were viséed for 52,138 pieces of freight, amounting to 3,415 tons.

Emigrants were examined as follows: Steamship *Shinano Maru*, for Seattle. Passed, 23. Recommended for rejection, 12. The emigrants passed, together with 2 intending passengers to Victoria by the steamship *Shinano Maru*, were inspected, bathed, and disinfected, and their effects were disinfected before embarkation.

During the week 3 cases of human hair were disinfected with formalin.

The official returns of infectious diseases for the week show 1 case of plague in Kobe.

It is officially reported that between January 1 and April 12, 1909, 410 cases of plague, with 334 deaths, occurred on the Island of Formosa. The authorities are using every means to eradicate the disease, but it is still on the increase. Formosa is situated 800 miles southwest of Kobe.

During the week ended April 17, 2 supplemental bills of health were granted to 2 steamships and one original bill of health was granted to 1 steamship.

There were inspected 167 members of crews and 42 steerage passengers. Fifty-three members of crews and 32 steerage passengers were bathed and disinfected. Their effects were disinfected by steam. The number of pieces of baggage steamed was 190 and of bedding 64. Manifests were viséed for 34,741 pieces of freight, amounting to 2,368 tons.

Emigrants were examined as follows: Steamship *Tenyo Maru* for Honolulu, passed 22, recommended for rejection 15; steamship *Tenyo Maru* for San Francisco, passed 10, recommended for rejection 2.

The official returns of infectious diseases for the week show that there was reported in Kobe 1 case of plague, with no death from that disease.

Report from Nagasaki—Examination of emigrants.

Sanitary Inspector Bowie reports, April 10:

Week ended April 10. Five emigrants examined; passed 1 for Honolulu; recommended for rejection 4—3 for San Francisco and 1 for Manila. Rejections were for trachoma.

No quarantinable disease present.

MEXICO.

Report from Coatzacoalcas—Inspection of vessels—Sanitary conditions.

Acting Assistant Surgeon Thompson reports, May 6:

Week ended May 5. Five vessels inspected. No illness occurred on these vessels while in port and all on board were well at the time of inspection.

No cases of any quarantinable disease have been reported. The health of the port is satisfactory.

Report from Mexico City—No yellow fever in Republic of Mexico—Preventive measures observed.

Doctor Liceaga, president of the superior board of health of Mexico, states, under date of May 10, that no case of yellow fever had occurred in the Republic of Mexico during the week ended May 8, and that prophylactic measures, consisting principally in the isolation of suspects, the destruction of mosquitoes and larvæ, and local sanitation, are observed in the localities in which yellow-fever cases have occurred during the past nine months.

Reports from Salina Cruz—Fumigation of vessel.

Acting Assistant Surgeon Gochicoa reports, April 24 and May 2:

Week ended April 24. No transactions.

Week ended May 1. One vessel fumigated.
